Summary

I am a Full Stack Developer dedicated to turning innovative ideas into high-quality software solutions. With extensive experience building full-stack applications using modern technologies like the MERN stack, PostgreSQL, and Docker, I prioritize productivity and efficiency. My expertise in JavaScript, React, and Node.js allows me to create robust web applications, and I thrive in collaborative environments where I can utilize my problem-solving and adaptability skills

Education

DB Collage Sasthamcotta	Kollam
B.A History	01/2017 - 06/2020
Brotoype	Kochi
Web Development	2024

Skills

Your Skill · React.js · Node.js · Express.js · MongoDB · AWS EC2 · Bootstrap · Chart.js · CSS · Docker · EJS · Figma · Git · GitHub · Google Firebase · HTML · JavaScript · jQuery · JWT · Modular · MVC · Netlify · Nginx · Wintson · PostgreSQL · Postman · Redux · REST · Stripe · Tailwind · TypeScript · Vercel · Visual Studio · Redux Toolkit

Projects

Devlink

<https://dev-link-frontend.vercel.app/>

DevLink: freelance job marketplace built with the **MERN stack** — **MongoDB**, **Express.js**, **React.js**, and **Node.js** — along with **TypeScript**. Implemented **JWT-based role authentication** (User, Client, Admin), and built core features such as **job posting and bidding**, **real-time messaging** using **Socket.IO**, **Stripe payments**, and **profile verification**. Designed a dynamic **admin dashboard** with analytics using **Chart.js** and **ApexCharts**, and enabled **Cloudinary** integration for file uploads. Created a responsive, animated UI with **Vite**, **Tailwind CSS**, **shadcn/ui**, **HeroUI**, and **Framer Motion**. Integrated the **Groq AI chatbot**, used **Docker** for containerization, and structured the backend with the **Clean Architecture**, ensuring secure, scalable REST APIs with **CORS**, **rate limiting**, and robust modular design.

Onecart

<https://onecart.onrender.com/login>

OneCart: a full-featured e-commerce web app for designer products using **Node.js**, **Express.js**, **MongoDB (Cloud Atlas)**, and **EJS**. Implemented user-side features like authentication, search, advanced sorting, wishlist, cart, wallet, address and order management, along with Razorpay integration and invoice generation. Developed admin modules for managing users, products (multi-image), categories, orders, coupons, and offers. Added features like sales reports (exportable to Excel/PDF), analytics graphs, and top 10 rankings. Styled with **Tailwind CSS**, handled async tasks via **AJAX**, and deployed securely on **AWS EC2 with Nginx**, ensuring scalability and smooth performance.

Mini-Projects

- Readora(Article feed application) – [GitHub](#)
- ZocketX (Realtime Chat Application) - [GitHub](#)
- Clever-Ai(AI Chatbot) – [GitHub](#)
- Netflix Clone – [GitHub](#)
